### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Peter Lalos on 18 November 2009.

The application has been amended as follows:

**Claim 31** has been amended to read --

A transmission comprising:

a housing;

a bearing mounted in said housing;

a differential gear provided with a case having at least one longitudinally disposed fluid passageway, disposed in said case;

a pair of axially aligned driven shafts disposed coaxially with said bearing, drivingly connected to said differential gear disposed therebetween;

a hollow drive shaft receiving one of said driven shafts therein, provided with a fixed pulley and an axially displaceable pulley thereon;

a guide member affixed to said drive shaft, journaled in said bearing and drivingly connected to said differential gear case, provided with means including an expandable

chamber for displacing said displaceable pulley, and at least one fluid passageway communicating with said chamber; and

a conduit inserted in openings in said guide member and said differential gear case, intercommunicating said passageways therein, wherein said conduit extends through the inner opening of said bearing. --

**Claim 32** has been canceled.

**Claims 33 and 34** have been amended to depend from claim 31.

**Claim 37 line 2** has been amended to read -- worm gear -- in replacement of "Torson".

**Paragraph 0013 (p. 3 line 20) of the specification** has been amended to include -- also known as a worm gear differential, -- after "the differential gear case of a torsen differential,".

The following is an examiner's statement of reasons for allowance: the prior art fails to teach or suggest a pulley transmission guide member in combination with a worm gear differential, having a conduit extending between the differential gear case and the pulley transmission guide member within the inner race of the supporting bearing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas Irvin whose telephone number is (571)270-3095. The examiner can normally be reached on M-F 10-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Siconolfi can be reached on (571) 272-7124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
